Transport in Olomouc itself is covered mostly by trams and buses with a dense transport network. They run all week and schedules are available at all public transport stops and ensures convenient travel throughout the city. Everything is very close and many important places are accessible by walk, as well.

It is about 7 minutes by walk from University office to the city center.

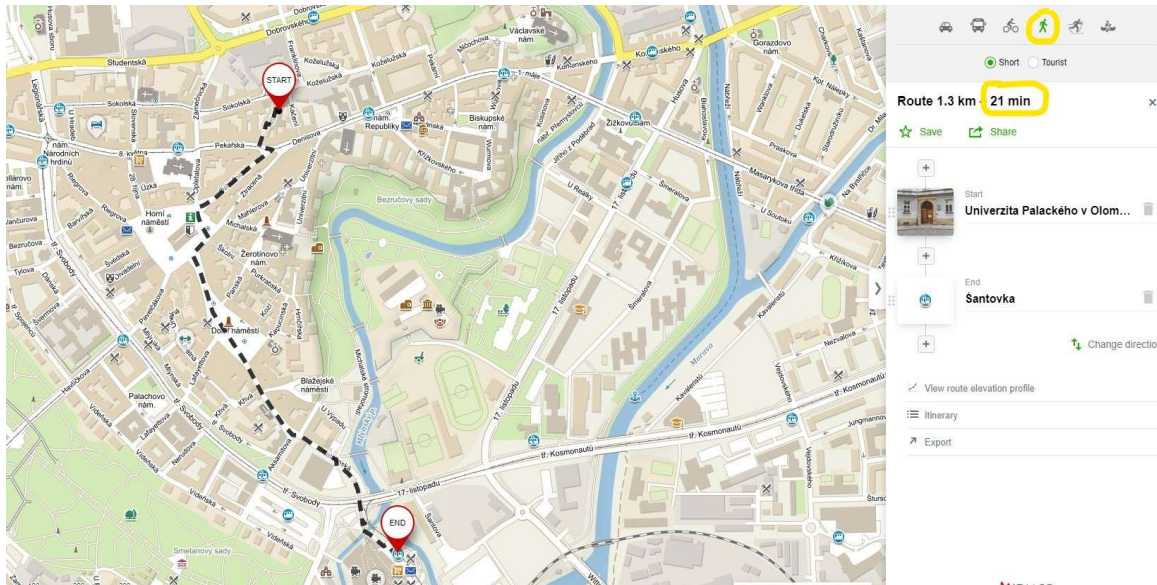

About 30 minutes by walk from University office to the train station (10 minutes by tram)

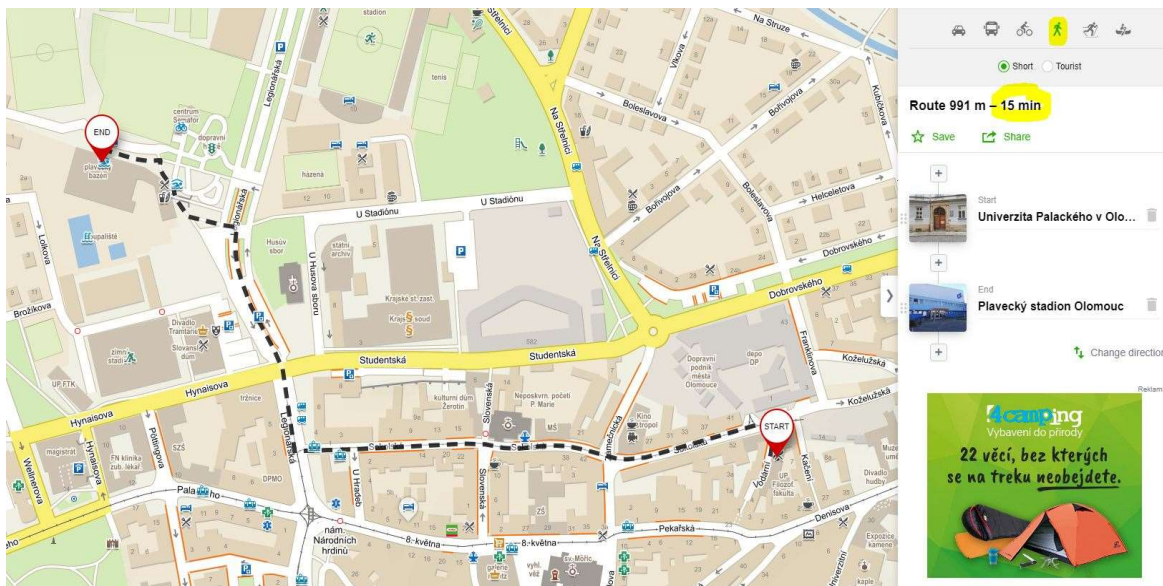

About 20 minutes by walk through the city center from the University office to the shopping center (10 minutes by tram)

About 15 minutes by walk from the University office to the swimming pool)

This map shows the local purchasing power index of each country (Poland value was set to 100 because it lies approximately in the middle, both geographically and numerically). The value itself does not matter, but the ratio of the indices of two different countries tells you how many times more (or less) goods, services, rents, etc., an average inhabitant of the first country can buy compared to the other country. For example, an average German can buy almost twice (1.83x) as many cars, rent twice as many flats, eat twice as often in a restaurant, etc., than an average Pole.
